

Stewarding information technology to lasting security solutions

COMPANY PROFILE

Who We Are What We Do

OUR VISION

To be the service company that best anticipates, understands and exceeds our customer's expectations

CORE SERVICES

A tradition of technologically superior products coupled with a proven track record in successfully rolling out and supporting major projects within the region, gives JABSOFT AFRICA a sustainable competitive advantage. JABSOFT AFRICA works in partnership with our customers in developing tailored solutions that deliver unique and measurable business and operational benefits.

We have therefore specialized our core services and emphasized on the provision of high quality and well engineered video surveillance systems, Access controls systems including video door phones, Fire alarm and detection systems, and we are also an integrator of biometric time and attendance systems.

Strengthened by a vast experience and training from leading supply companies in the world, we also deal in fleet and fuel management systems, coupled by asset management systems. We also major in ICT solutions, data networks and being in strong partnership with key software companies we undertake server installations, Enterprise Resource Planning application and software development. We are also specialists in cable infrastructure and are consultants in field installation logistics.

JABSOFT AFRICA distinguishes itself from competitors by offering turn key products and advanced software solutions combined with our recognized industry-leading customer service and support. Our continual emphasis on research and development of next generation products ensures the company remains ahead of the market, meeting demands for value-added, flexible, feature-rich and cost-effective technology.

Our after sales service and support is backed by the vast technical know how and field experience gained from some of the leading brands in the world.

SYSTEM OPERATION

In the quest for a raised standard and professionalism in our operation, JABSOFT AFRICA has developed a unique Enterprise Resource Planning system that facilitates a quick access to client database. This enhances a close relation with our clientele and a 24 hour open communication to acquire a fast, reliable and efficient response in the event of system malfunction.

All customers' service request are traced using a service requisition number, which ensures that all services are logged, tracked and updated, ensuring that real-time status data is available to the client. Overdue services are automatically reported to the executive for review and action on daily basis.

EXPERTISE

We have a dedicated team of technicians who are trained in all aspects of system installation and maintenance, having years of combined experience in surveillance technologies, computer security, electronics and field installation logistics. To keep up to date the latest advances in technology, the technicians undergo regular training to maintain our installation standards and quality workmanship.

BRANDS

We are proud to represent manufactures of leading brands in the world, bringing a state of the art technology to the local and regional market. By maintaining close working relation with these companies JABSOFT AFRICA ensures that all warranties and maintenance programs are honored for all installations and that all brand advantages are fully realized by the client.

RELIABILITY

JABSOFT AFRICA has created a large resource base which is always available to ensure all projects have available manpower and equipment in order to meet the most demanding completion deadlines and budget

We are proud to offer our services throughout Kenya, deploying our resources where they are needed to get the job done.

You can be sure that all your needs can be met with unmatched reliability and service..

HEALTH AND SAFETY

JABSOFT AFRICA ensures that it's staff are able to work safely in all environments, with the establishment of robust internal health and safety manuals and procedures. Staff undergoes routine training and refresher courses; in addition all tools and equipment are inspected continuously to assure reliable and safe operation.

Video Surveillance Absolute Observation

JABSOFT AFRICA collaborates with organizations to develop long term strategies for CCTV surveillance, whether the aim is continuing improvement or to design new system architectures. We represent most of the leading CCTV equipment manufactures in the world, Bosch, Prama Hik vision, Van Gold, Axis Avtech, Vertigo, Pelco and much more, offering outstanding quality, industry leading warranty periods and technological innovations that meet almost any specifications and budget.

With the ability to supply and install virtually any type of observation system JABSOFT AFRICA has demonstrated the capacity to meet the most demanding requirements in almost every industry, segment and business setup across the region from small micro enterprise, industrial plant supply chain supermarkets and banking sector to remote surveillance of cell towers, hence we have become a source of solution across board.

Access Control Protecting Your Business

JABSOFT AFRICA offers a wide range of access control solutions that cater to specific segments in the market. These are Enterprise access control solutions, Light industry access control solutions and Small microenterprise and residential solutions.

Enterprise Solutions

As a major player in the deployment of multi-site large industry installations JABSOFT AFRICA offers the most extensive portfolio of products that enable large multi-site organizations to handle their specialized security needs. We offer reader technologies from bar-code to biometrics as well as seamless integration of visitor, ID credential, and Alarm monitoring.

Our solutions can offer world class security at the local level regardless of the size of business or regional reach.

Light Industry Solutions

When security requirements are more straight forward and basic entry/exit needs to be controlled without the need of extensive reporting, JABSOFT AFRICA is able to position entry level solutions that can accommodate almost any budget and

requirement without compromising the safety or quality of the product to the end user.

Small Micro Enterprise and Residential Solutions

Being a solution provider across board we emphasize on strategies that accommodate small microenterprises catapult their business prospects by offering most basic solutions that require minimal supervision whereas access is controlled effectively. JABSOFT AFRICA therefore offers a platform to an entry level that is least costly yet still quality is not compromised. Since we hardly take chance in what would be a security lapse in all life endeavors, we also provide access control systems that are exclusively applicable in residential areas e.g. Video door phone hence with JABSOFT AFRICA one is secured everywhere all the time.

Fire Alarm Systems Diffusing Uncertainty

JABSOFT AFRICA represents the world's leading manufacturers of automatic fire detection, early warning systems, and suppression solutions. We install and maintain both light commercial and industrial fire detection systems from small conventional systems consisting of a handful of detectors in a single office to large multi building digital systems consisting of hundreds of detectors, ventilation interphase, voice evacuation and computerized graphics.

We also offer early warning fire detection and suppression systems for specialized situations. All of our fire detection systems can be integrated with our access control, EVAC and building management systems, and depending on the level of integration required, all systems can be operated from a single software package.

Detection Systems Peace Of Mind

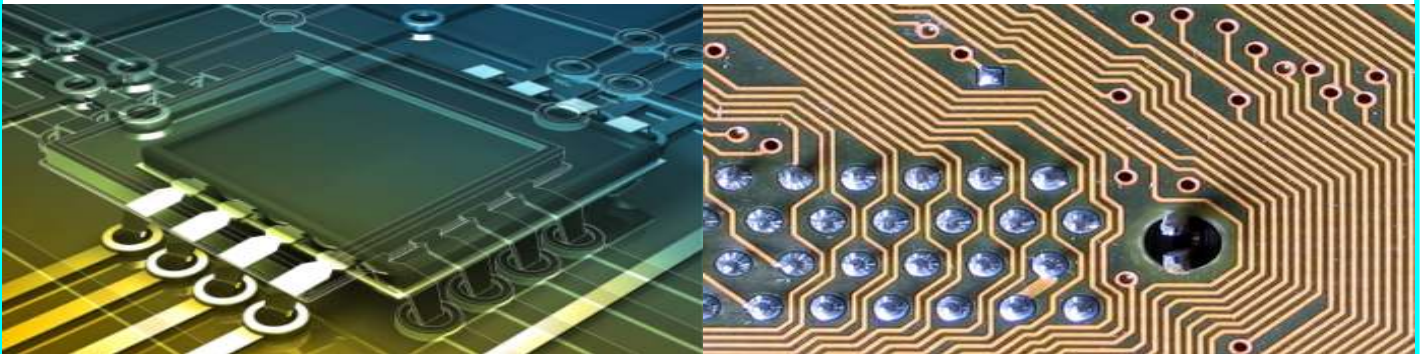

JABSOFT AFRICA offer solutions that go beyond, conventional alarm systems to encompass Electrified Perimeter fencing, Perimeter lighting equipment, Outdoor motion detection systems (including beam detection systems), Guard touring and management systems, Apartment/multi-residential panic system and wireless Alert solutions.

Our intrusion detection systems are compatible with most emergency response provider of your choice. Experience in the industry enables us also to provide distinctive solutions that also utilize specialized equipment such as seismic detectors (that detect intrusion attempts through ware house or safe room wall by drilling or hummer) and Explosive/Narcotics trace detectors that analyze trace ions to determine if a person or object has been exposed to either explosives or narcotics

Time and Attendance Systems Enhancing Efficiency

Automating time and attendance for your organization has never been easier or more affordable than now, with our time and attendance module which can seamlessly integrate with a wide range of payroll and HR management systems.

JABSOFT AFRICA offers an open ended and customizable time and attendance system that will allow you easy and efficient control of attendance and punctuality of all employees in your company. With the use of the popular biometrics or badge readers, employees' attendance will be monitored and a wide range of management reports generated based on these transactions.

Managers can remotely monitor and get up to the second reports regarding employee time and attendance from anywhere anytime.

Key Benefits

- Ø Accurate time recording information for specific areas
- Ø Ability to use the data stored for management purposes
- Ø Potential to link into automated payments for payroll
- Ø No preparation and distribution of time cards
- Ø Time-card information is calculated automatically by user defined criteria
- Ø No illegible punch registrations
- Ø No manual recording of exceptions and exception history

Ø Historical reports provide access to valuable historical information

Ø No problem processing labour reports on time. The system calculates as employs punch, eliminating "pay period crunch"

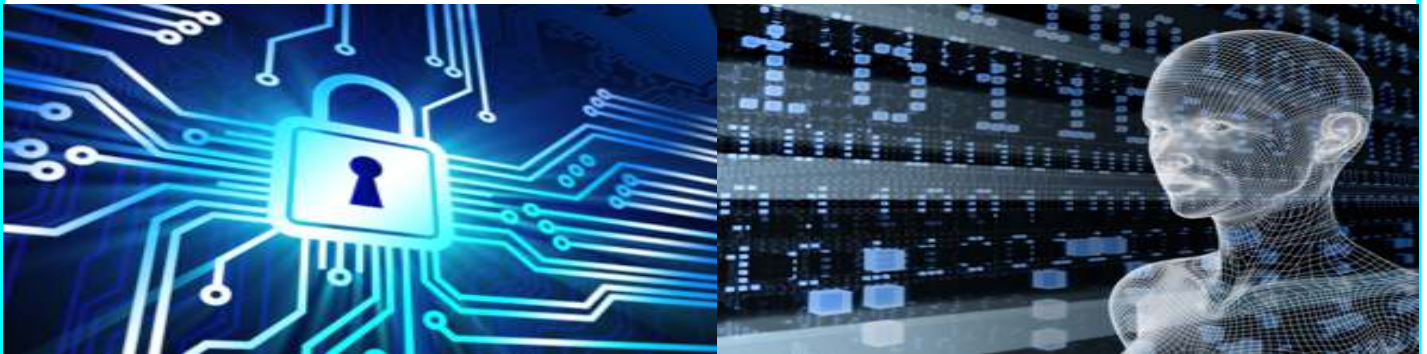

Data Networks and Infrastructure Connecting To The Business World

JABSOFT AFRICA has been a major player in providing complete network cabling solutions to customers throughout Kenya. From data center services to wireless infrastructure and more, our clients include major corporations, financial institutions, small micro enterprise businesses, and county governments. Whatever your needs, we have the skills, experience and desire to help you build a superior communications infrastructure for your network.

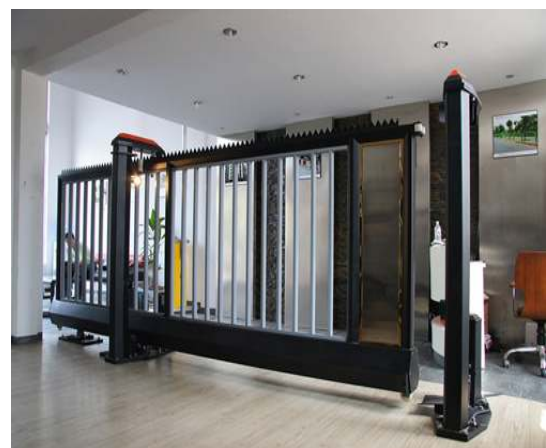

Automation Systems Simplifying Workforce

Our automation systems provide you with a future proof answer to increasingly exciting plant and machinery requirements. They are engineered to meet the needs of all industry sectors in a virtually limitless range of tasks. The superiority of our systems provides, peak efficiency, extensive flexibility and high cost effectiveness in every application.

Our automation systems are synonymous with excellence because of our commitment to superior engineering and technology. We have consistently advanced technological progress in automation. Our systems cover all industry requirements and set the standards in their respective fields.

Fleet Management Systems Saving On Cost

JABSOFT AFRICA provides a comprehensive range of fleet management services to private and corporate organizations within the region. The company has at its disposal, professional manpower, both locally and within sub Saharan Africa, operating to internationally recognized quality management standards.

JABSOFT AFRICA has a concise company policy and is committed to offering first class fleet management services with emphasis on safety, pollution prevention and to providing a high standard of on board maintenance at a reasonable cost to our clients.

JABSOFT AFRICA's clients include large and medium corporate organizations and not-for-profit (government funded) bodies including major private and public hospitals, schools ,and charities

Asset Management System Tracking Your Resources

Our technology and electronic division designs and develops a robust range of asset management and monitoring systems using GPS satellite positioning, GSM cellular communication systems and other advanced communication and sensory technologies. The result is innovative and advanced machine to machine communication that gives our customers 24x7 information and monitoring of their mobile assets to and cost-reduction targets.

Fuel Management Systems Reducing Operational Costs

JABSOFT AFRICA is committed to present the market innovative solutions based on patent-protected products that combine sophistication and simplicity, resulting into field-proven solutions you can count on!

Our Solutions and Stand-alone products include:

Retail Management Solutions:

- Automatic Refueling
- On-line fuel transactions services
- Fuel forecourt management
- Convenience stores

Stock and suppliers management

Enterprise Resource Planning Intergrating Your Business

JABSOFT AFRICA also deals in ERP systems providing an integrated view of core business processes often in real-time, using common databases maintained by a database management system.

ERP systems track business resources—cash, raw materials, production capacity—and the status of business commitments: orders, purchase orders, and payroll. The applications that make up the system share data across the various departments (manufacturing, purchasing, sales, accounting, etc.) that provide the data. ERP facilitates information flow between all business functions, and manages connections to outside stakeholders.

Considering ERP system as a vital organizational tool, JABSOFT AFRICA uses its integration portfolio to vary organizational systems thus facilitating error-free transactions and production. ERP systems run on a variety of computer hardware and network configurations, typically using a database as an information repository.

ICT Staying Ahead of Technology

JABSOFT AFRICA works to accommodate vendor's needs to liquidate excess and end-of-life inventory of computer parts and components. We purchase computer components and related products from major Reknown and foreign original equipment and component manufacturers, as well as from smaller, specialized high-tech companies, retailers and distributors

JABSOFT AFRICA product line includes, but is not limited, by the following product lines: 3Com NBX IP telephony systems; 3Com, HP, H3C, Nortel switches, hubs, routers, modules, NICs, and other networking equipment
